

# Coolubricator JR™

Single Point Lubrication Value

## Single Spray Simplicity

The Unist Coolubricator JR™ offers compact, portable lubrication for applications where a single nozzle can provide adequate lubrication and manual on/off control is desired. A magnetic mounting base on both the unit and nozzle allows you to move the Coolubricator JR™ between separate machines or applications. The Coolubricator JR's™ compact size allows it to fit where other lubricators can't.

Magnetic base makes mounting quick & easy!

- Fluid adjustment
- Air adjustment
- Built-in manual on/off valve
- Portable, 5' (1.5 m) hose, 12" (304.8 mm) plastic nozzle
- Reliable, .03 cc/stroke Unist pump
- Proven, 100 million cycle pulse generator
- Tough, vented 16 oz. (473.2 mL) reservoir
- Heavy-duty magnetic base
